

- PERFECT ROUND HOLES
- CONCENTRIC & ACCURATE HOLES
- HOLE TAPER CONTROLLED
- NO ANGLE LIMIT
- NO BURNING EFFECT
- NO MATERIAL ALTERATION
- WITHOUT ENTRANCE AND EXIT DEFORMATION
- HIGH PRODUCTIVITY QUALITY
- HIGH QUALITY SURFACE
- HIGH PRECISION FINISHING

3D μEDM

IF YOU NEED THIS TOP PERFORMANCE WITH REDUCED MACHINING TIMES, WITHOUT MATERIAL ALTERATION, CALL SARIX OR VISIT US

THE BEST MICRO EROSION TECHNOLOGY SINCE 1993
SARIX

EVOLUTION IN CONTINUITY

SARIX celebrates 30 years of leadership in Micro EDM technology with special offers for our customers. We pride ourselves on our commitment to providing updates and performance improvements for our machines, even after years of use.

In today's competitive market, customers not only require reliability from their equipment, but also constant quality, performance, and the ability for technological evolution over the years.

SARIX upgrade packages provide this evolution on all of its machines, preserving your machine investment for a long time.

SARIX 30th Anniversary **NEW CNC UPGRADE OFFER** Machine software and hardware "evolution in continuity" Industry 4.0 compliant

- **SX-CNC UPGRADE: SX-HMI** Full stainless-steel interface keyboard IP65, machine program editing, DXF drawing display and programming.
- **SX-SDS SARIX DIGITAL SERVICES**, optimized preventive and prescriptive maintenance *
Guides the operator and maintenance technician in performing the necessary operations to ensure optimal machine condition, production quality and reducing the maintenance costs. The maintenance manager can adapt the plan of his workshop to the specific needs. Possibility to restrict each maintenance operation to a specific user level. Implements periodic, preventive, condition-based and predictive maintenance.

Includes QR reader for maintenance operation

CNC update package compatible with SARIX CU V7
ask for your machine configuration package.

SARIX 30th Anniversary **MACHINE PACKAGES SX80-DRILL** **SPECIAL PRICE OFFERING**

Machine software and hardware "evolution in continuity"

High speed drilling for finished and starting holes from 0.05 to 4.0 mm electrode size

- **SX80-Drill Semi-automatic precision drilling machine**
PULSAR generator with fiber optic communication and **New CNC** package.
SX-ROT manual rotating spindle with basic configuration of 5 electrodes diameter of **SP02** collet and **SG01** guides set.
- **SX80-Drill Automatic precision drilling machine**
PULSAR generator with fiber optic communication and **New CNC** package.
SX-A344 automatic rotating spindle with basic configuration with **SP-MDC** multi diameter collet and 5 diameter of **SG01** guides set.
- **SX80-Drill Automatic high precision drilling machine**
PULSAR generator with fiber optic communication and **New CNC** package.
SX-A344 automatic rotating spindle with basic configuration of 5 electrodes diameter, **SP-12** quick change collet and **SG01** guides set.

* Option: LAN / Cloud machine integration and machine health monitoring.
Remote customer service support. Full machine status and reporting on Cloud SARIX Helpdesk.
