

SARIX is a leading company in the field of micro-machining machines production. It develops and manufactures high-precision machines using EDM, laser and micro-milling technologies.

For the expansion of our Technologies and Applications department we are looking for

Process Technician for machining with EDM

Activities

- Programming of machining operations in ISO language and on CAM for Sarix machine tools
- Realization of machining on Sarix machines starting from the drawing
- Optimization of processing time and quality of execution
- Equipment conception and execution, final machine setup for customer applications
- Commissioning of machining processes at customer sites, customer training

Your Profile

- Training as an SSST technician or other higher vocational training in precision mechanics
- Knowledge of EDM and/or laser process
- Familiarity with micromechanics
- Familiarity with CNC machine tools
- Knowledge of CAM software
- Precision and care in work
- Analysis and synthesis skills
- Good knowledge of PC Office programs, in particular Excel
- Good knowledge of at least one national language (French and/or German) and English

Work location

- 6592 S. Antonino

Hiring priority for Swiss citizens or those with permanent residence in Switzerland (permit B or C)

Send your resume to job@sarix.com with "PROCESS PROFILE" in the subject line.

Only applicants who meet the requirements will be responded to.
